PROFESSIONAL SUMMARY

“The greater danger for most of us lies not in setting our aim too high and falling short, but in setting our aim too low and achieving our mark.” - Michelangelo

Motivated and innovative product manager with expertise in project management, product development, and customer experience optimization.

EXPERIENCE

09/2023 - Current

Associate I, Program Management Office, Director Office

Air Selangor

Air Selangor, the largest water services provider in Malaysia and the third largest in the region, has set an ambitious goal to become the leading water service in Asia by 2030.

• AI Chatbot Implementation

- Launched a bilingual AI chatbot (English/Malay) to handle core customer inquiries end-to-end and perform toe to toe compared to human-created tickets.
- Successfully trained the chatbot to handle a top range of customer issues, reducing reliance on human agents.
- Integrated API-driven automation, allowing the chatbot to verify customer details and streamline ticket creation.

• Process Redesign and Workflow Streamlining

- Collaborated with cross-functional teams to initiate and execute process redesign initiatives, focusing on enhancing efficiency and reducing operational bottlenecks.
- Analyzed business inputs to prioritize the product backlog, ensuring alignment with key stakeholders while maintaining agility.
- Developed and refined customer journeys to enhance user satisfaction and streamline support processes.
- Implemented task automation strategies to drive efficiency gains and enhance overall productivity.
- Actively contributed to the identification and elimination of operational bottlenecks, promoting a more streamlined and effective workflow.

- Completed Google UX Certificate through Coursera 2020
- Completed Introduction to HTML5 offered by University of Michigan through Coursera.

2019

- Completed Programming Fundamental offered by Duke University through Coursera.
- Completed Cloud Basics through Percipio.
- Completed Scrum Master Certification through International Scrum Institute.
- Completed Scrum Product Owner through Scrum Institute.

- Draw.io

• Lifestyle Ecosystem Expansion

- Analyzed market research findings to identify high-impact lifestyle content and features relevant to users of a utility app.
- Prioritized and implemented lifestyle modules (e.g., educational content, curated experiences, and value-added features) within the app to enrich user engagement beyond traditional water services.
- Collaborated with internal teams and vendors to scope, validate, and deploy selected features in line with app development timelines and platform capabilities.
- Contributed to Air Selangor's digital transformation by redefining the role of a utility app in a modern lifestyle ecosystem.

07/2022 - 08/2023

Product Manager

TOGL technology

TOGL Technology was established on the 26th September 2017 as a US listed company. Specializing in Technology Innovation, TOGL Technology has been on the forefront of improving the quality of life through the advancement of In-House Innovation

• Yippi Application

Yippi Application is adopting an e-reward model, letting users earn rebates by spending with their partners for e-commerce, holiday bookings, bill payments, and more.

- Assisted the transition of Yippi towards an e-reward business module.
- Simplifying and improving the features in Yippi to draw users to use the app more frequently
- Collaborated closely with the business department team on the requirements for the app.

• ANTC Virtual event

TOGA's annual Asean New Tech Conference shifted to a global virtual format in 2023, featuring a 360 virtual showroom and talks, enabling worldwide participation without the need for physical presence.

- Led the transformation of the Asean New Tech Conference (ANTC) from a physical to a virtual event in 2023.
- Ensured global accessibility, enabling users to participate in the event virtually.
- Introduced a 360 virtual showroom, talks, and product displays for an immersive online experience.

• Automate testing for TOGL product

Spearheaded the company's shift to automated testing, identifying vendors, creating and executing scripts.

- Initiated and executed the shift from manual testing to automation testing for the TOGL product.
- Identified suitable vendors for automation testing, enhancing testing efficiency and coverage.
- Personally engaged in creating and executing automated scripts, ensuring the reliability of the testing process.
- Facilitated meetings between vendors and management, presenting the benefits and drawbacks of automation testing.

04/2021 - 06/2022

Junior Project Manager

MinistryXR

Embarking on a new role as Project Manager at MinistryXR, focused on Spatial Computing interfaces (AR, VR, MR, Multimodal Interaction, Tangible UI). Key achievements include:

- **Herbalife Virtual Extravaganza**

Achieved success with Herbalife Virtual Extravaganza 2021, uniting 35,000+ members for virtual training and entertainment across 14 Asia Pacific countries. Client committed to our company for their next annual event 2022.

- Collaborated closely with the team to ensure the event's success, demonstrating effective project management skills.
- Received positive feedback from the client, indicating their intention to engage my company for the next annual get-together event.
- Demonstrated adaptability and leadership in navigating virtual event challenges and ensuring a seamless experience for participants.

- **AR Implementation projects**

Taken the lead in implementing AR projects, demonstrating initiative and delivering successful outcomes. Notably, ensured the timely delivery of an AR tutorial for Astro Set Top Box and secured a winning proposal for Kotex's Social AR application.

- Successfully delivered timely and efficient AR projects
- Achieved viral effects, that enhances product visibility and engagement.
- Demonstrated commitment to effective project management and successful technology integration.

- **Tiger Virtual Street Food Festival 2.0**

Building on the success of its predecessor, users explore a virtual world with 120+ food vendors, engaging in games to earn points for redeemable virtual and physical gifts, enhancing the culinary journey.

- Elevated expectations for Tiger Virtual Street Food Festival 2.0, paving the way for continued success.
- Facilitated the participation of over 120 food vendors, diversifying and expanding the culinary offerings.
- Introduced engaging virtual games, enabling users to earn points for redeemable virtual and physical gifts.
- Demonstrated adept project management skills in delivering an award-winning virtual event.

- **HR Employee Handbook initiative**

Teamed up with HR to launch the Employee Handbook site, facilitating handbook updates and employee score tracking. This initiative reflects our commitment to a well-informed and values-driven workplace.

- Collaborated with HR to launch the HR Employee Handbook site, ensuring seamless access for company employees.
- Derived a scoring system for implementation on tabulating employee performance based on their understanding of the handbook.
- Aligned the initiative with company core values, emphasizing the importance of employees being well-versed in the handbook.

- **MISC Presidential Town Hall**

Our team created an annual virtual reality experience for MISC's Presidential Town Hall, fostering company-wide discussions and interactions. We also added a playful touch with legofied representations of MISC offices globally.

- Led the development of an annual virtual reality web experience for MISC's Presidential Town Hall.
- Enabled company-wide participation, fostering discussions and interactions among MISC employees.
- Injected a playful element by creating legofied representations of MISC offices worldwide.

08/2018 - 04/2021

Internship and Management Trainee

ValueLabs

Started as an intern and progressed to Management Trainee, acquiring hands-on experience in full product lifecycle management. Collaborated with cross-functional teams, drafted QA test cases, supervised bug fixes, and ensured on-time delivery, including operational support for L2 tickets.

- Managed mini projects utilizing SharePoint, a web-based collaborative platform integrated with Microsoft Office.
- Requirement gathering, and understanding the needs of the customers.
- Working collaboratively with the Solution Architect and Software Engineers to deliver Software applications (websites, mobile applications, etc) as per the needs of the clients.
- Creating QA test cases and working with the Software Engineers to develop test features.
- Preparing product user guides for clients.
- Digital solutions operations support. Review L2 trouble tickets and worked with Software Engineers to troubleshoot and resolve issues faced by the clients.
- Assisting in data automation projects.

08/2015 - 08/2015

Internship

Yeoh & Khong

- Collaborated with lawyers and business partners to manage confidential data with accuracy and discretion.
- Assisted in maintaining and updating case files, emphasizing attention to detail and confidentiality.
- Strengthened communication skills by interacting with clients from diverse backgrounds.

10/2014 - 10/2014

Internship

Messrs Raja, Darryl

- Conducted legal research for trademark cases, providing valuable insights to assist in case preparation.
- Worked closely with senior lawyers to analyze case files and draft supporting documentation.
- Developed strong analytical and organizational skills by managing time-sensitive tasks in a fast-paced legal environment.
